

California Water Plan Analytical Tools and Data Work Group Meeting

**June 3rd, 2005
10:00 a.m. to 3:00 p.m.
Bonderson Hearing Room
1st Floor, 901 P Street
Sacramento**

Meeting Purpose and Goals:

- Present and discuss planned activities related to developing and improving quantitative information useful for statewide and regional water resource planning.
- Present and discuss a proposal to clarify and document the conceptual model(s) necessary to conduct integrated quantitative analysis over the long-term, using urban water supply reliability as an example.
- Discuss role of Analytical Tools and Data Work Group and others who would like to be involved as these activities proceed.

Meeting Agenda

1. Present planned activities
 - a. **Collaboration** – How can we collaborate between agencies and other interested parties to develop long-term quantitative capability? (Several ideas presented in the CWEMF draft report “Strategic Analysis Framework for Managing Water in California”)
 - b. **Information management** – What role can the State serve to improve water-related information sharing? What information would be most useful to start with?
 - c. **Numbers for 2010** – What quantitative deliverables are planned for Update 2010 and what process will we use to produce them?
 - i. Water Portfolios
 - ii. Scenarios (base conditions that could affect demand and supply)
 - iii. Response Packages (alternative water management strategies)
 - iv. Performance Comparisons
2. Discuss planned activities
3. Lunch (on your own)
4. Present a proposal to clarify and document the conceptual model(s)
5. Discuss ways to interact with stakeholders. Who should be involved? Are we missing anything?
